

Democrats in Congress offer a *New Direction*, putting the common good of all Americans first for a change, and will:

MAKE HEALTH CARE MORE AFFORDABLE

Fix the prescription drug program by putting people ahead of drug companies and HMOs, eliminating wasteful subsidies, negotiating lower drug prices and ensuring the program works for all seniors; invest in stem cell and other medical research.

LOWER GAS PRICES AND ACHIEVE ENERGY INDEPENDENCE

Crack down on price gouging; eliminate billions in subsidies for oil and gas companies and use the savings to provide consumer relief and develop American alternatives, including biofuels; promote energy efficient technology.

HELP WORKING FAMILIES

Raise the minimum wage; repeal tax giveaways that encourage companies to move jobs overseas.

CUT COLLEGE COSTS

Make college tuition deductible from taxes; expand Pell grants and cut student loan costs.

ENSURE DIGNIFIED RETIREMENT

Prevent the privatization of Social Security; expand savings incentives; ensure pension fairness.

REQUIRE FISCAL RESPONSIBILITY

Restore the budget discipline of the 1990s that helped eliminate deficits and spur record economic growth.

THE WRONG DIRECTION

The Bush Administration and the Republican Majority in Congress have taken the country in the wrong direction for Americans and their families.

RIISING HEALTH CARE COSTS

Under this Administration, the cost of family health insurance has risen more than 70%, or an average of \$4,500 per family, and 6 million more Americans are uninsured. Meanwhile, the Majority has enacted a confusing and costly prescription drug benefit that prohibits Medicare from negotiating lower drug prices, has cut funding for medical research, and has prohibited federal funding of a real stem cell research program.

RIISING ENERGY PRICES

Gas prices have nearly doubled and exceed \$3.00 per gallon in many places, and dependence on foreign oil increased to 60%. Meanwhile, the Republican Majority has blocked efforts to ban price gouging, rewarded oil and gas companies with billions in new subsidies at a time of record profits, and opposed investments in alternative fuels and energy efficient technology.

RIISING ECONOMIC INSECURITY

Real family income has fallen every year of the Bush Administration, while CEO compensation has soared. Meanwhile, the Majority has blocked any increase in the minimum wage for 7.5 million workers, while providing billions in corporate tax subsidies that encourage sending jobs overseas.

RIISING DEFICITS AND DEBT

The Majority has turned a projected \$5.6 trillion budget surplus into a \$3.2 trillion budget deficit and put us on course to double our national debt to nearly \$12 trillion by 2011.

RIISING COLLEGE COSTS

Tuition has increased by \$2,000 (57%) at public universities and by \$5,000 (32%) at private universities since the 2000-2001 school year. Meanwhile, the Majority has cut \$12 billion from college student aid, increasing the costs of loans; has frozen Pell Grants for higher education; and has failed to extend the college tuition tax deduction.

RIISING RETIREMENT INSECURITY

The Majority has fought to privatize Social Security, which would have cut benefits for the middle class and added trillions to our debt, and failed to protect workers' pensions while CEOs receive hundred-million dollar retirement packages.
